**Descriptive Information :** Recalled vehicles are vehicles with special internal manufacturing codes identifying the vehicles as subject to internal use ("internal use vehicles"). Volkswagen has discovered that documentation about possible modification(s) made to these vehicles during their internal use period may be incomplete or could not be verified. The recalled vehicles differ from non-recalled vehicles in that the actual build status of the recalled population was not properly documented within each Volkswagen IT system.

Description of the Noncompliance : Volkswagen has discovered that (i) the pre-series vehicles were sold without confirmation that they were built to Volkswagen's series production standards and applicable regulatory requirements, and that documentation about their build status may be incomplete or could not be verified and (ii) documentation about possible modification(s) made to the internal use vehicles during their internal use period may be incomplete or could not be verified. The recalled vehicles differ from non-recalled vehicles in that they may contain non-standard components and/or the actual build status of the recalled population was not properly documented by Volkswagen. Volkswagen is not aware of any accidents or injuries as a result of this issue.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : Due to the potential inclusion of non-standard components, missing documentation of the actual build status and unknown potential for modifications made during internal use, Volkswagen cannot specifically identify a safety risk. Volkswagen is not aware of any accidents or injuries as a result of this issue.

Description of the Cause : The established processes to ensure that pre-series vehicles are not sold to consumers and/or that complete documentation of modification(s) made during internal vehicle use were not properly followed.
